

# List of IP protocol numbers

From Wikipedia, the free encyclopedia

This is a list of the **IP protocol numbers** found in the field *Protocol* of the [IPv4 header](#) and the *Next Header* field of the [IPv6 header](#). It is an identifier for the encapsulated protocol and determines the layout of the data that immediately follows the header. Both fields are eight [bits](#) wide. Protocol numbers are maintained and published by the [Internet Assigned Numbers Authority](#) (IANA).<sup>[1]</sup>

Hex	Protocol Number	Keyword	Protocol	References/ <a href="#">RFC</a>
0x00	0	HOPOPT	<a href="#">IPv6 Hop-by-Hop Option</a>	RFC <a href="#">8200</a>
